SANBS

Oh my Goodness

it's so easy to host a blood drive in your area.

And there are over

10 000

reasons to join the

Good Food

Our challenge is to collect **3 500 units of blood per day, which could save the lives of more than 10 000 people.**

And it's super easy to do

just book a blood drive in your area and come together as a community.

You'll be glad to know that when you book your blood drive;

- We will set you up with a go-to person - a dedicated Donor Relations Practitioner who will handle space logistics, queries, admin and will be available to you on the day.
- Your Donor Relations Practitioner will lead a team of trained professionals to take care of your safety, run the process, **from set-up, sign-ups to clean up.**
- The minimum venue size for a two-bed blood drive is **5m x 5m or 25m² (that's about the size of two parking bays).** Any additional logistics required relating to the venue (e.g. marquee or gazebo) will be arranged with the Donor Relations Practitioner.

So, we have:
The discreet, professional team that will manage the admin, safety protocols and any additional logistics required relating to the venue.

And you've got the goods:
As a valued leader of your community, you can motivate the people of your hood to become a force for good and make a difference by donating blood.
